COMPUTER

YOUR FREE TRIAL

When you finish registering you land on the **free trial dashboard**, where you can try autograder for yourself.

The free trial gives you **2 free evaluations**. One evaluation grades one student's answer sheet against the question paper and the answer key.

You will upload three documents:

Question paper.

Answer key or reference document. A document with the answers, such as the textbook chapter the questions came from. It is optional, but an answer key gives better and faster grading.

Student answer sheet.

EVALUATING...

Papers read. Grading 5 questions - usually 10-20 seconds

0:03

With a full class, sheets are graded side by side in parallel. i.e., 30 sheets take about 6 minutes.

While autograder works, the page shows what it is doing and a running timer. Grading usually takes from a few seconds to about a minute.

EVALUATION RESULTS

TOTAL MARKS

39/50

78% • GOOD

Question 1

Correct use of Newton's second law; units stated clearly.

10/10

Question 2

Correct diagram, but the friction arrow points the wrong way.

8/10

Question 3

Good derivation, but the final answer omits significant figures.

9/10

Question 4

Correct formula, but an arithmetic error in the last step gives the wrong value.

5/10

Question 5

Partially correct: momentum is conserved but kinetic energy is assumed conserved in an inelastic collision.

7/10

When grading finishes you see the **total marks** and, for every question, the marks awarded and a remark explaining any marks lost.
